Introduction

Resume

Scope of the document:-

Creating a resume using HTML and CSS can be a great way to showcase my skills and qualifications in a visually appealing format. With HTML and CSS, you have full control over the design and layout of your resume. CSS is used for styling, allowing you to define fonts, colors, layout, and responsiveness.

Ultimately, the goal is to create a visually appealing, well-organized, and easily readable document that highlights your skills and experience to potential employers or recruiters.

ROOT STRUCTURE:

- Mounika_Resume
 - Code
 - Resume.html
 - Resume.css
 - Photo1.jpg
 - Screenshots
 - Image-1.png
 - Image-2.png

CONTROL FLOW DIAGRAM:

HISTORY OF HTML:

HTML stands for Hyper Text Markup Language.

- It is used to share the information over the internet.
- HTML is developed by Tim Berners-Lee in 1991. But officially in 1993.
- The First version of HTML consists of “18 tags”.
- HTML follows certain rules and regulations setup by “ISO”.
- International Organization for standardization is set of rules and regulation are present in ‘**SGML**’ document.

Versions of HTML

- **HTML-1** version in the year 1993.
- **Html-2** version in the year 1995.
- **HTML-3.02** version in the year 1997.
- **HTML-4.1** version in the year 1999.
- **HTML-5** version in the year 2014.

Features of HTML

- It is easy to Learn.
- It is a tag-based language.
- HTML is supported by multiple browsers.
- First web browser is Netscape navigation which was developed by the “Mosaic”.
- It is a portable language.
- **WORA** stands for ‘write once run anywhere’

Limitations of HTML

- HTML has fewer designing capabilities
- It is dependent on other technology such as CSS in order to develop well designed web pages.
- HTML has no programming capabilities.
- Using HTML and CSS we can develop only static Web page.
- In order to write the HTML code required an editor such as VS Code, Notepad, Eclipse.
- In order to execute the HTML code, we required Web browsers like Chrome, Firefox, edge, Opera Safari.

CSS

- **CSS** stands for “Cascading Style Sheets”.
- It was developed by W3C to add stylings to the HTML elements.
- W3C stands for World Wide Web.com

Versions of CSS:

- **CSS-1** (Level-1) in the year 1996.
- **CSS-2** (Level-2) in the year 1998.
- **CSS-3** (Level-3) in the year 1999.

Why do we require CSS ?

- Since HTML has fewer designing capabilities we cannot create well designed or most appealing Websites.
- Using HTML we cannot add style, animation and transitions to the Webpage.
- Therefore, we require CSS to create well designed Webpage

Advantages of CSS

- It allows to add styles, animation and various effects to the Webpage.
- It allows us to develop the Webpage rapidly. It is also known as RAD (rapid application Developer).
- It allows us to separate from formatting develop page to the presentation of Webpage.
- It allows to create well designed Websites.

Limitations of CSS

- Using CSS, we can perform static styles for the Webpages.
- In order to create dynamic styling for the Websites. We must make use of scripting language such as JavaScript and Libraries of JavaScript.

Types of CSS:

1. Inline CSS
2. Internal CSS
3. External CSS
4. Default Browser CSS

Inline CSS:

Defining all the CSS properties within the style attribute inside the opening of the tag is referred to as Inline CSS.

Internal CSS:

Defining all the CSS properties within <style> inside the HTML document is referred to as Internal CSS.

External CSS:

Defining all the CSS properties within as external Script or File with an extension CSS is referred to as External CSS.

- In order to link external CSS file within the HTML document we must use of <link>.
- The value for the 'ref' attribute should be "stylesheet".

Conclusion

In conclusion, using HTML and CSS to create your resume gives you the freedom to design a visually appealing and interactive document that can help you stand out in today's competitive job market. Just remember to strike a balance between creativity and professionalism, ensuring that your resume effectively communicates my qualifications and experiences to potential employers.
